

YOU'RE INVITED TO A FREE SCREENING OF COUNTED OUT!

www.countedoutfilm.com

COUNTED OUT - A FILM BY VICKI ABELES - investigates the biggest crises of our time - racism, political polarization, economic inequity, a global pandemic, climate change - through the unexpected lens of math. This striking documentary exposes systemic inequities that weaponize math as a gatekeeper. And shines a light on math as the foundation of democracy and economic opportunity that allows everyone to fully participate in this fast-moving society.
