## Important Considerations for Seat Selection

Passengers should be aware that seat availability varies depending on aircraft type and route. EgyptAir operates a mixed fleet including Boeing 737s, 777s, 787 Dreamliners, and Airbus A320s, A330s, each with different cabin configurations. For long-haul international flights, seat selection becomes particularly important for comfort during extended travel periods. EgyptAir Plus members enjoy complimentary preferred seat selection based on their tier level—Silver, Gold, or Platinum status determines the number of free selections available per booking. Passengers traveling with infants can request bassinet positions, which are typically located at bulkhead rows and must be reserved well in advance due to limited availability. If you are traveling with medical equipment that requires floor storage, notifying EgyptAir through +1-855-485-0341 or +1-888-348-6013 ensures appropriate seating allocation. Group bookings of ten or more

passengers may have seat selection restrictions to maintain cabin balance, though +1-855-485-0341 or +1-888-348-6013 can coordinate special arrangements for families or corporate groups. In cases of involuntary seat changes due to aircraft swaps or operational requirements, EgyptAir will attempt to provide equivalent or better seating and passengers can verify alternatives by contacting +1-855-485-0341 or +1-888-348-6013. For passengers with connecting flights on EgyptAir or partner airlines, selecting seats on all segments simultaneously prevents boarding complications. Remember that exit row seats come with specific eligibility requirements including age restrictions and physical capability to assist in emergencies, which +1-855-485-0341 or +1-888-348-6013 can clarify during your selection process.
